5. Tools and Data used during 2025

During 2025 the Company deployed several methodologies and tools to monitor, and where applicable adjust, its reception and transmission parameters to ensure consistency with its overarching obligation to offer the best possible result for its clients' orders. In broad terms the Company monitors on an ongoing basis its execution venue arrangements by selecting appropriate samples of orders executed and evaluates the samples in accordance with the following dimensions:

(a) Evaluating the Company's execution venues in accordance with the following:

- Pricing Frequency (price updates in real time);
- Speed of execution;
- Frequency and duration of price freezing;
- Depth of liquidity;
- Pricing transparency;
- Slippage frequency etc.

(b) Price Fairness by comparing independent prices relayed by independent market data providers with the prices quoted by its execution venues, as well as comparing prices between execution venues not listed in the company's execution venues list. For this purpose, the Company has subscribed to independent price aggregators (such as Bloomberg, Thompson Reuters, etc.) and uses quarterly reports published by other execution venues that trade similar or identical financial instruments with those offered by the execution venues used by the Company.

(c) Technological prowess of execution venues' systems (responsiveness of interface, lag, integration with the IT systems of the execution venues etc.).
